Planned Parenthood Gulf Coast, an affiliate of Planned Parenthood (PP), the largest abortion business in the nation, has built a 7,000-square-foot facility on S. Claiborne Avenue. This multimillion-dollar “New Orleans Health Center” plans to become a regional abortion center in the heart of New Orleans, leading to an increase in abortions in New Orleans.

Facts are Clear: More Planned Parenthood = More Abortion

- **PP is the nation's largest abortion business**, performing approximately 1/3 of U.S. abortions (PP performed 323,999 abortions in 2014).
- **PP abortion numbers have continued to increase or remain the same** as national abortion rates have either decreased or remained consistent.

**MORE
PLANNED PARENTHOOD
= MORE ABORTIONS**

PP Overwhelmingly Favors Abortion for Pregnant Clients

- **PP consistently shows a trend of driving women to choose abortion** instead of options that are less financially beneficial for PP, such as adoption or prenatal care.
 - **PP performs abortions on 9 out of 10 pregnant women** who walk through their doors.
 - **PP performed 160 abortions for every one adoption referral in 2014.** Abortions accounted for 94% of PP's pregnancy services, while prenatal care accounted for 5% and adoption referrals for 0.5%.
- **Abby Johnson, former PP abortion facility director in Texas, reports being given monthly quotas** for the number of abortions her facility was expected to perform in a given month by her superiors at PP Gulf Coast.

Other PP Women's Health Services Readily Available in New Orleans

- Every non-abortion service that PP could offer at its Claiborne Avenue facility is already available in New Orleans.

Contraception and Cancer Prevention Services Dropping; Abortion Also Finally Down

- **Fewer Prevention Services:** Cancer prevention services **dropped by 27%** from 2013 to 2014.
- **Less Contraception:** Contraceptive services at PP **dropped by 18%** from 2013 to 2014.
- **Less Abortions:** Abortion services at PP **decreased slightly** between 2014 and 2015.

Taxpayer Funding and Abortion Income Represents Large Portion of PP Income

- **Taxpayer Funding:** PP reported \$554 million in taxpayer funding in 2014-15, **43%** of PP total annual revenue.
- **Abortion Income:** PP collected \$150.6 million in abortion revenues in 2013-2014 representing **49.3%** of its non-governmental health services income. While PP states that abortion constitutes 3% of its services, it misleads the public by weighing all products and services equally, no matter their cost.

Abortion and Planned Parenthood Adversely Impacts the Minority Community

- African Americans make up **12,6%** of U.S. population, but account for **30%** of all abortions
- In La., 1 in 5 African American pregnancies ends in abortion. Nationally, 1 in 2.7 black pregnancies end in abortion.
- **Margaret Sanger, Founder of Planned Parenthood, Advocated Eugenics:** Sanger, a strong advocate for eugenics, advocated the “weeding out” of “genetically unfit” populations.
- **79% of PP Abortion Facilities Located Near Minority Neighborhoods:** The 2010 Census reveals that PP has located 79% of its 165 abortion facilities within walking distance of African American or Hispanic/Latino neighborhoods.

2 Lawsuits Alleging Medicaid Fraud by PP Gulf Coast Settled with State of Texas for \$1.4 Million

- One of the lawsuits, brought by Ms. Abby Johnson, former director of PPGC's Bryan, TX clinic, alleged that PPGC improperly received over \$5 million in taxpayer funding through its fraudulent billing scheme.
